Custom Software

Electromotive Systems' engineering group can furnish custom drive software to meet unique application requirements. Please consult factory.

DataLogger

Designed to simplify troubleshooting and gather information for preventative maintenance, the DataLogger is a recording device for IMPULSE®•Series 3 Crane Controls. This user-friendly device simply plugs into the keypad pocket of the drive and allows operators to easily access the run, alarm and fault histories. It includes enough memory to log the last 1400 drive run events and the last 400 alarm and fault events. A trace function is provided for viewing drive data that occurred prior to the alarm/fault condition.

IMPULSE®•Link

Designed to communicate with the IMPULSE®•Series 3 Crane Controls, the IMPULSE®•Link is a Windows-based interactive drive software package. This use-friendly software allows you to accomplish the following:

The touchpad soft keys and various screens on the Datalogger are completely intuitive.

- Upload and download drive parameters
- Adjust drive parameters online or offline
- View and print drive parameters
- View complete parameter descriptions
- Compare drive parameters

The Save Parameters As allows the user to save parameters to a different parameter file or create a new parameter file.

After Market Product Support

Magnetek supports all of its IMPULSE® crane controls with:

- 24 Hour On-Call Service
- On-Site Technical Support (when necessary)
- Emergency Crane Control Replacement
- A Two Year Warrantys
- On-site and In-House Product Training Programs
